Team ID	--
Project Name	Strategic Product Placement Analysis
Maximum Marks	--

Data Preprocessing Steps :

- Imported the dataset into Tableau.
- Checked for missing values and handled them.
- Removed duplicate records.
- Corrected data types (e.g., text, numbers, dates).
- Renamed columns to make them easier to understand.
- Filtered unnecessary data that was not required for the analysis.
- Created calculated fields for better insights.
- Verified the cleaned dataset before building visualizations.

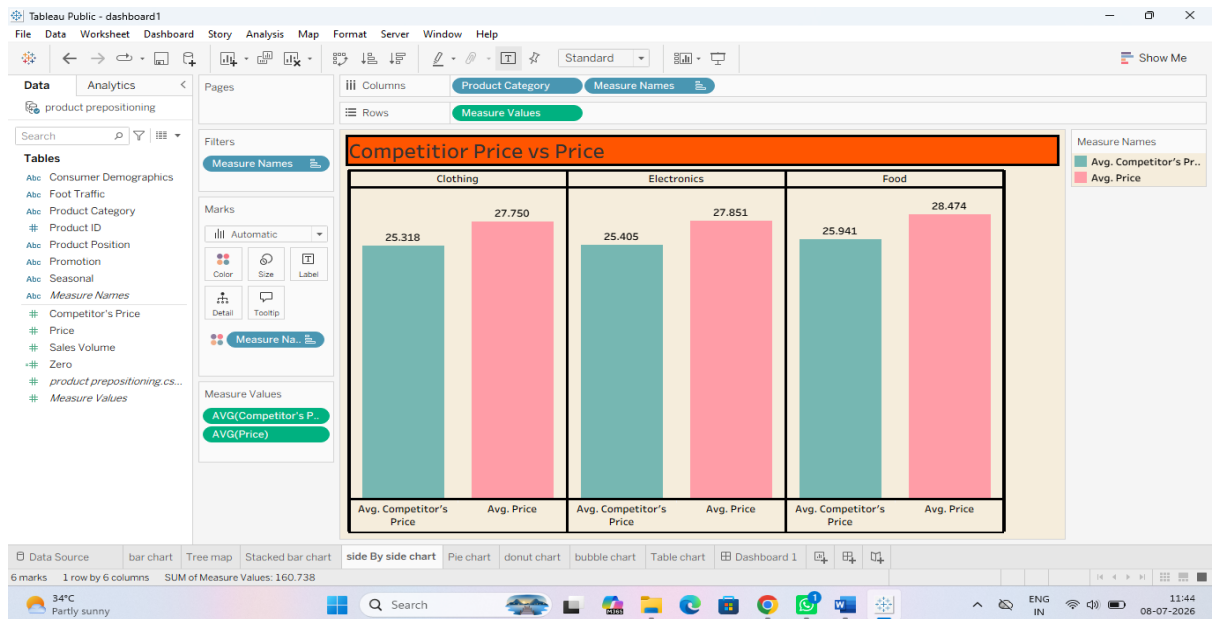

Business Questions & Visualizations:

1: Which product category has the highest average sales volume?

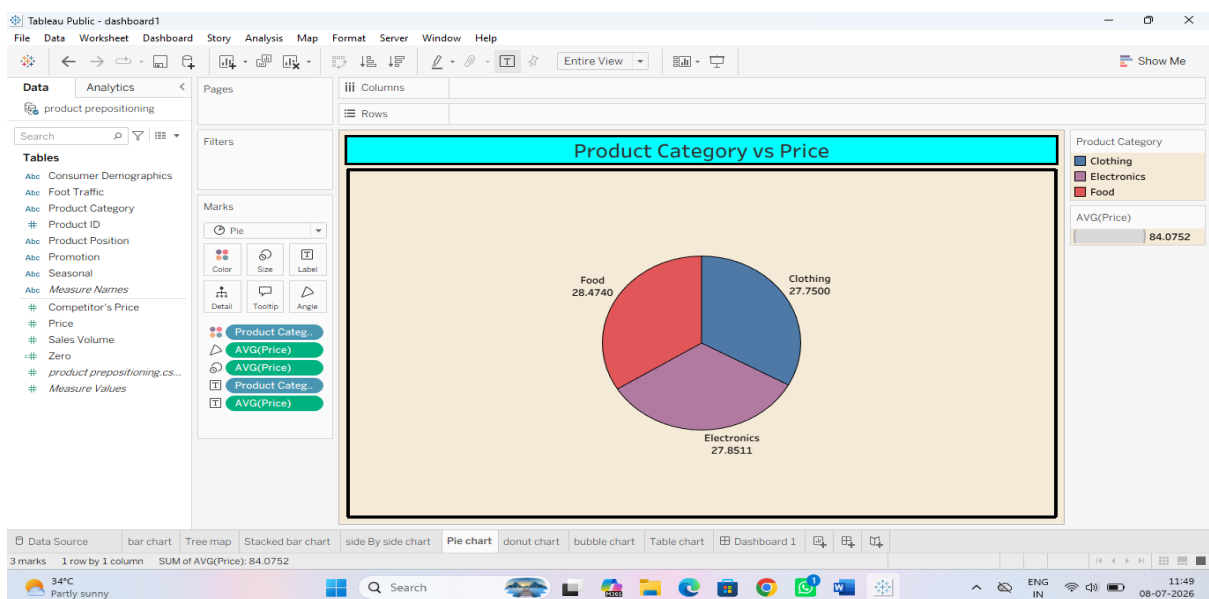

Clothing Category

2.Which product category has the largest price difference between our products and competitor products?

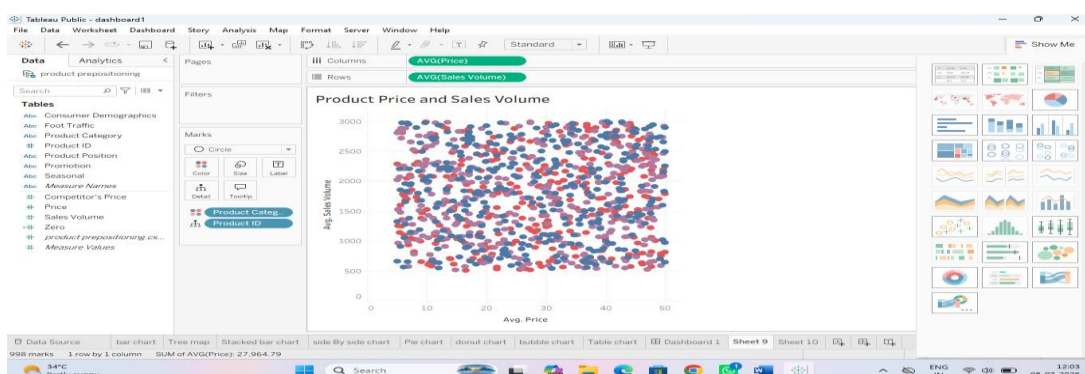

Food Category

3. How is the average product price distributed across different product categories?

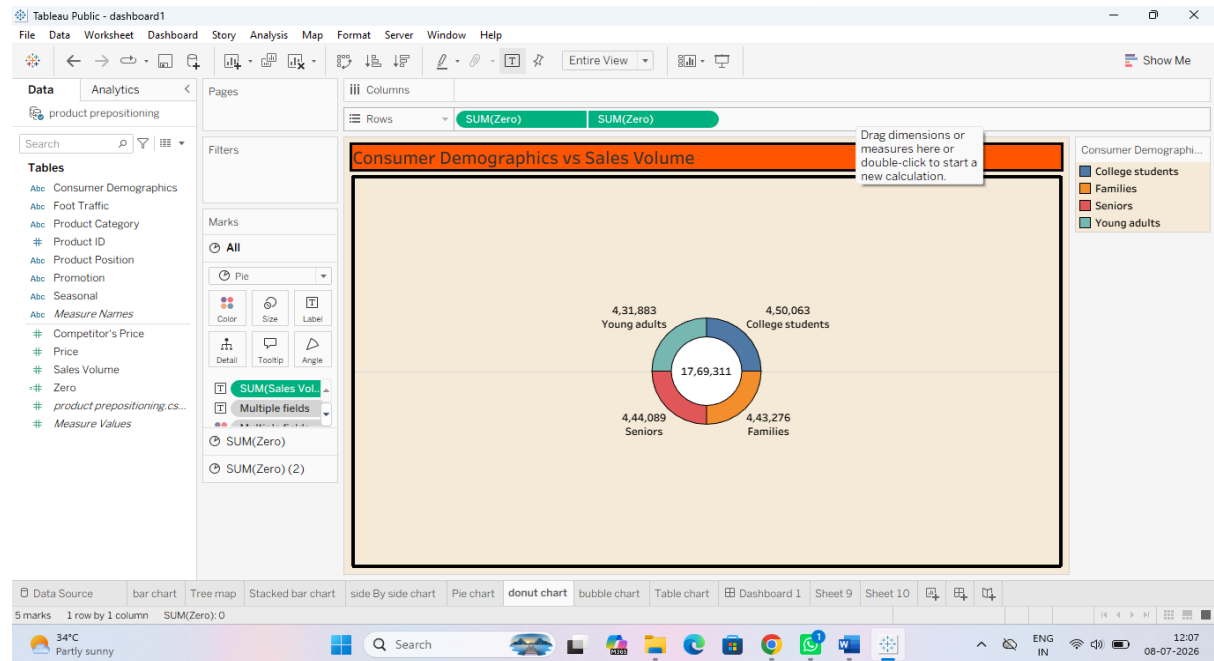

4. Is there a relationship between product price and sales volume?

The scatter plot shows that sales volume is distributed across different price levels.

There is no strong upward or downward trend visible. A few products have exceptionally high sales volume compared to the rest.

5. Which customer demographic contributes the highest sales volume?

College Students.
